Retail recoveries flattened while auction values continued to underperform.

Retail recoveries remained flat, while auction values underperformed.

Heavy Earthmoving Equipment

Market Update

Values throughout 2019 for general construction and heavy earthmoving equipment have softened in the auction channel. Conversely, there have been some bright signs in the retail channel where values have, for the most part, remained flat.

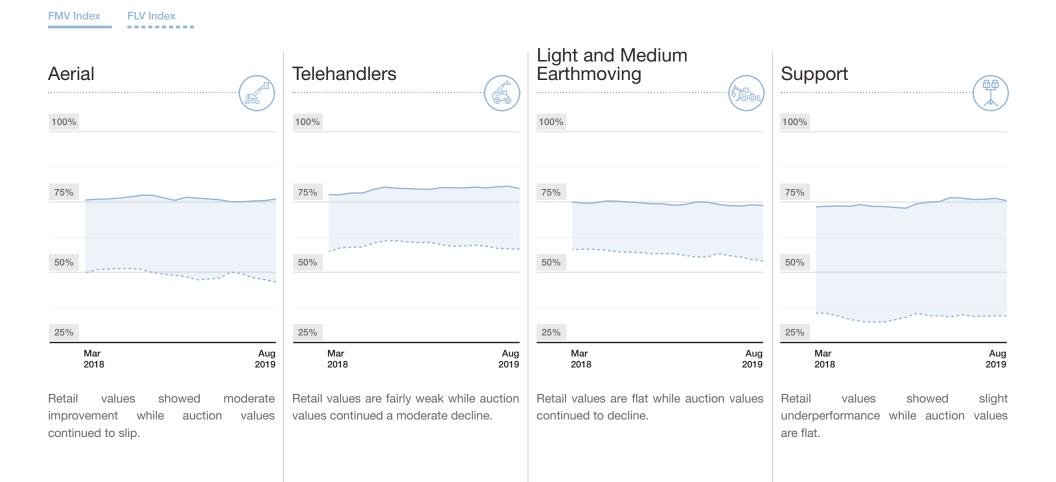

This trend first surfaced in February's major auction events. Heavy earthmoving products were the first to be impacted, with observed downward pressure on excavator values and – to a lesser extent – dozers and wheel loaders. As the year progressed, similar patterns have appeared across general construction products, namely aerial equipment, telehandlers, and light and medium earth moving equipment.

The downward trend in equipment values comes on the back of very strong results in 2018 which represented a market peak for many products. In addition to the price weakness in the used equipment markets, Rouse has observed a notable spike in volumes (units) of equipment that has been coming for sale into the auction channel.

Other Equipment

FMV Index

FLV Index

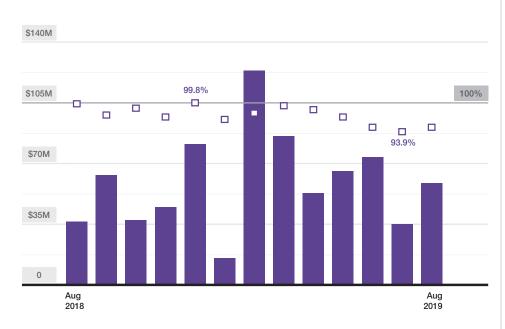

Retail values have flattened and auction values have also shown a slightly positive trend. Auction values are down slightly, following a consistent trend for several months.

Auction Results

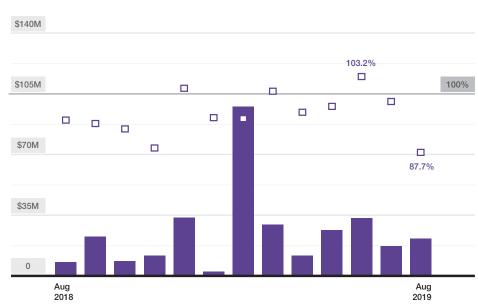

General Construction Equipment Results

Auction achievements were below the prior month's market benchmark for general construction equipment and have shown a consistent negative trend for all of 2019. Volume is up year over year and month over month.

Heavy Earthmoving Equipment Results

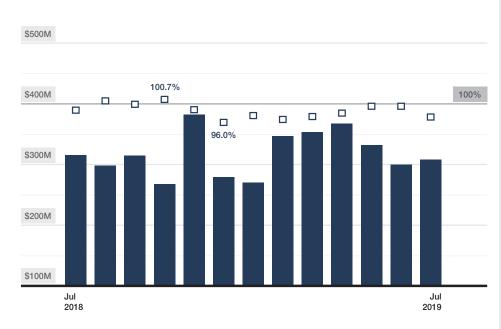

Auction results were well below the prior month's market benchmark for heavy earthmoving equipment. Volume is up year over year and month over month.

Retail Results

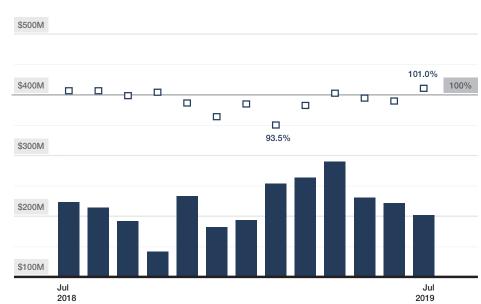

General Construction Equipment Results

Retail achievements were below the prior month's market benchmark for general construction equipment. Volume is down year over year but up month over month.

Heavy Earthmoving Equipment Results

Retail achievements were above the prior month's market benchmark for heavy earthmoving equipment. Volume is down year over year and month over month.

Glossary

Fair Market Value ("FMV"): A professional opinion of the estimated most probable price expressed in terms of currency to be realized for property in an exchange between a willing buyer and a willing seller, with equity to both, neither being under any compulsion to buy or sell, and both parties fully aware of all relevant facts as of the effective date of the report. Additionally, this value is not discounted for assembling, cleaning, security, advertising, brokerage, or other disposal costs, if any.

Forced Liquidation Value ("FLV" or "AUCTION"): The estimated gross amount expressed in terms of money that the Equipment will typically realize at a properly conducted public auction when the seller is compelled to sell as of a specific date within a 60 to 90 day period. This amount does not account for Equipment make ready costs or transportation of the Equipment to the auction site. All Equipment to be sold piecemeal, "as is where is" with the purchaser being responsible for removal of the assets at purchaser's own risk and expense.

Value Index: Each monthly data point in any given value index represents the average recovery, as a percentage of cost, for ten different model years of equipment ranging from new to nine years old, with each year weighted equally.

Chart Constituents: Each chart represents a composite value index that is equally weighted amongst its respective constituents.

FLV Recovery: The FLV recovery represents the aggregate performance of individual auction sales in any given month measured against the prevailing Rouse FLVs at the time of the sale. For example, an auction sale that took place in the month of July would be compared to the Rouse FLV for the same make-model-year equipment that was effective as of June 30th.

Equipment Index

Chart	Constituents
General Construction Equipment	Aerial Telehandlers Light/Medium Earthmoving Support
Aerial	Telescopic Booms Articulating Booms Scissor Lifts
Telehandlers	Telehandlers
Light/Medium Earthmoving	Backhoe Loaders Compact Track Loaders 0-179 HP Dozers 0-74,999 Lb Excavators Skid Steer Loaders 0-189 HP Wheel Loaders
Support	Air Compressors Generators HVAC Lighting Equipment
Heavy Earthmoving Equipment	75,000+ Lb Excavators 180+ HP Crawler Dozers 190+ HP Wheel Loaders Articulated Trucks Motor Graders
Excavators	75,000+ Lb Excavators
Dozers	180+ HP Crawler Dozers
Wheel Loaders	190+ HP Wheel Loaders
Articulated Trucks	Articulated Trucks
Forklift Trucks	Forklift Trucks
Truck Tractors	Truck Tractors

About Rouse

Rouse is the construction equipment industry's leading information services company. We deliver the most accurate and reliable information in the rental and construction industries. Our powerful suite of services includes valuations, used equipment sales support and rental metrics benchmarking. Rouse Services provides the knowledge you need to make more informed business decisions.

Rouse Appraisals

Rouse Appraisals provides rental companies, construction equipment dealers, and their investors and lenders with the most accurate appraisals and equipment valuation information available. On an annual basis, Rouse Appraisals values approximately \$40 billion of equipment, tracks more than 30,000 unique make / models, and analyzes nearly \$10 billion of retail, auction, and trade-in sales of used equipment.
